

League Results Matrix : Round R14 2008-09 (FINAL)

May 26, 2009

The tables show the VPs score and IMPs difference (from the home team's perspective) for each match, with home teams on the left, and away teams above the match results in each division.

Except for defaulted matches, and any other adjusted or awarded scores, 12 VPs are shared by the home + away teams, and the IMPs score applicable to the away team is equal and opposite to that shown for the home team.

Matches scheduled in R14 (or otherwise played since R13) are shaded pale green (even if the result is not available).

Postponed matches (+ any rearranged to a date earlier than originally scheduled) are shaded pink (even if in R14). The team who postponed is shown in brackets, followed by the rearranged date if this has been agreed.

Defaulted / adjusted matches are shaded pale yellow. Total VPs in such a match are often less than 12, but IMPs will still usually be equal and opposite. In any exceptional case, a 2nd IMPs score will be shown, being the IMPs (+, - or zero) awarded to the away team in respect of that match.
